

THE POWER TO PROTECT & PREVENT

OUR CLIENTS' CARE IS IN OUR HANDS.

Home Care workers are essential to keeping our most susceptible safe, which puts them at the front line of the COVID-19 outbreak response. While our clients are at a higher risk of complications, they're also fortunately in low-risk environments, meaning we must protect their health by preventing their exposure.

In order to Protect & Prevent we must:

- 1. Wash hands frequently**
- 2. Disinfect surfaces routinely**
- 3. Check clients for fever/symptoms daily**
- 4. Maintain a safe distance always**
- 5. Check in regularly**
